

Introducing The Talking Thermostat

The easy to use, simple to program, digital thermostat that actually talks to you.

If you've "shied away" from complicated programmable thermostats because they confuse and frustrate you, then welcome to the world's best "talking" thermostat. The Talking Thermostat provides clear, concise step-by-step instructions to help you program your own personal comfort levels. Plus, it does much more. With features such as "Filter Alert" and "Call For Service" the Talking Thermostat helps you protect one of your home's most valuable investments. Improving your comfort and lowering your utility bills has never been so easy! See the back for more details about the Talking Thermostat!

Homeowners tell us they absolutely love the Talking Thermostat

Take a look at all of these valuable features and you'll see why.

"Do you want to change the program, yes or no?" "Do you want to change the date or time, yes or no?" These are just a few of the simple interactive verbal instructions built into the Talking Thermostat. With each setup feature and function this incredible, patented device "talks you through" programming. It's easy and actually fun to do. Plus, this handy tool can quickly pay for itself by helping remind you of important service intervals and filter changes. Talk to your professional service technician for a full demonstration and see why customers "love" the Talking Thermostat!

5/2 Day Programming

Separate weekday and weekend programs, each with four time and temperature settings.

Manual Operation

This is really 2 thermostats built into 1 powerful performance control center. User can select programmable or non-programmable (manual) mode of operation yet still receive verbal "help" messaging and verbal system status reports.

Quick Programming Override

User can override programming to a manual temperature setting. Manual temperature setting automatically resets temperature at next programmed time.

Freeze Protection

Auto heat at 40° F even if batteries are dead.

Compressor Protection

Delay prevents "short cycling" damage.

Filter Alert

"FILT" display and voice message alert indicates when the air filter needs cleaning or replacement. Set to display in increments of 100 operating hours.

Call For Service

Like the "service" light on your automobile, the "CFS" displays when cooling & heating operation reaches a required service interval.

Low Battery Alert

"LO BAT" display and voice message alert indicates when replacement batteries are needed.

"Armchair" Programming

Allows you to program the thermostat away from the wall mounting bracket.

E-Z Talk Through Instructions

Guides you through each step of programming.

Lighted Display

For easy night viewing.
